Metro Wire and Cable Announcement Regarding Conflict Free Materials

As many of our valued suppliers and customers have acknowledged, the Dodd-Frank Act of 2010 created a new reporting expectation for product manufacturers and distributors like Metro Wire and Cable, Corporation (MWC). By not actively supporting mining operations and manufacturers who are extracting minerals from 'Conflict' regions of the globe, MWC is steadfast on supporting humanitarianism, democracy, and social responsibility.

The need to procure and distribute materials from 'Conflict-Free' regions of the World has always been the goal for Metro Wire and Cable. To that end, MWC makes the commitment to:

- Will not knowingly purchase and supply customers with 'Conflicted' material.
- Support the United States legislature and their goal to have only 'Conflict-Free' materials enter the United States of America.
- Comply with requests for information regarding the material and minerals that Metro Wire and Cable supplies its valued customers.

Since 1976, Metro Wire and Cable has been an industry leading distributor of electrical and electronic wire and cable. One of the Nation's top two-hundred electrical distributors, MWC provides warehousing, supply chain, and delivery services of wire and cable products for a broad spectrum of markets, including, but not limited to: public utilities, electrical contractors, wind farm developers, commercial and industrial HVAC industries, traffic signal and airport lighting contractors, Original Equipment Manufacturers (OEM's) and the security industry.

Metro Wire, founded in Detroit, Michigan in 1976, established its Southeast Regional Distribution Center in Atlanta, Georgia in 1981, and it's Midwest Regional Distribution Center in Iowa City, Iowa in 2008. The company, now headquartered in Sterling Heights, Michigan, maintains extensive inventories tailored specifically to customer requirements at each location.

For more information regarding conflict material or minerals, please contact Nate Tallman, Corporate Development Director, 1-586-264-3050, ntallman@metrowire.net.
